I drive an over the road truck. I enjoy listening to my XM Radio. On some occasions I listen to the instant traffic and weather. If I want to know the weather in DC and I'm in St. Louis, MO. Where else can I find it? I think that the traffic is great in towns that I don't get into that often. If you try to listen to the local radio, you might hear the traffic 3-4 times an hour. XM is more than that. Don't sink to the level that the NAB has. I pay for what I listen to on XM. It is my right to do that. Voting in favor of this petition would be a disgrace.
